

7321B Series

Solenoid Valves for water, light oils and steam

ENGINEERING YOUR SUCCESS.

7321B/7322B Series

7321B 2/2 pilot operated valves are the best solution anywhere a perfect control media , such water, steam, and light oils, is required.

This product line provides a high flow rate, a fast reaction time, and a superior reliability in a robust and modern design.

Our 7321B Series can be associated with the most of our FCSE coil ranges, including ATEX, and IP67 electrical parts.

Applications

7321B Series can be used to control water, hot water, and steam , in plumbing , industrial washing machines, car wash installations, cooling of machine tools, hydrocleaners, autoclaves and irrigation systems.

Benefits

- High performing with low and high operating pressure differential
- Exclusive diaphragm design for a Superior Flow Rate
- Modular concept: a wide range of electrical parts increase the versatility of this product
- Manual override and speed control options

Material Specifications

Valve body:	CW617N UNI EN 12165:98 Forged Brass
Enclosing tube:	AISI 304 stainless steel
Plunger:	AISI 430F St. Steel
Spring:	AISI 302 St. Steel
Seals:	NBR (Buna N) - EPDM FKM (Viton)
Shading ring:	Copper

Installation

Valves can be mounted in any position. It is however recommended to install them with the coil in a vertical position above the body.

Media

These valves have been developed to achieve the best performances for water, steam and light oils (up to 2°E). 7321B Series can not be used with gases and air.

We recommend choosing NBR versions for water (max. temp. 90°C), FKM version for water/light oils control (applications up to 140°C) EPDM version for superheated water and steam (up to 140°C)

Options

Manual Override

7321B Series (NC version only) can be ordered with Manual override to operate the valve without connecting the coil.

The control consists of a slotted-head screw for a screwdriver and has two possible positions:

Closed: The letter "C" is in the upper position of the screw head (fig.1,2)

Open: The letter "A" is in the upper position of the screw head (fig.1,2)

Manual override must be restored to its original position (Closed) to operate the valve through the solenoid control.

Standing in its closed position, the valve operates normally when the coil is energised/de-energised. Manual and speed control are standard on 2 ½" and 3" versions.

Speed Control Option (Anti-Water Hammer Control)

Parker 7321B Series (NC version only) is available with a Speed control option. The closure time of certain types can be changed by means of the adjusting screw. The latter, by acting as a throttle on the inlet equalisation (pilot) hole of the valve, slows down the closure speed of the valve, thus reducing the water hammer effect.

The regulation range is as follows:

Screw fully open: Max. closure speed

Screw fully closed: Valve always open

Please consult diagrams on page 5 of this catalogue for details of shut-off response time with speed control option.

COILS FOR DIN PLUG CONNECTION

These coils can be mounted with every Parker solenoid valve corresponding to the specified Coil Group.

See column "Coil Group" in the valve pages.

This is an encapsulated assembly comprising a coil, integral magnetic iron path, and snap-on plug connection.

The synthetic material encapsulation provides an effective compact housing, offering full protection against dust, oil, water, etc.

Ease of mounting in a confined space - offers shock and corrosion protection - simplifies conversion of existing equipment to other requirements, etc.

Coils conform to the IEC/CENELEC safety standards and comply with European low-voltage directive.

Electrical connection		The coil is connected with a 2 P + E plug according to EN 175301-803 type A					
Ambient temperature		-40°C to +50°C The application is limited also by the temperature range of the valve.

To Order a Coil choose Coil Ref + Voltage Code, example: 481865 for 24 VDC = 481865C2

More voltage possibilities can be found in the table of voltage codes at the end of the coil section.

IP67 COILS WITH FLYING LEADS

This coil can be mounted with every Parker solenoid valve corresponding to the specified Coil Group.

See column "Coil Group" in the valve pages.

This is an encapsulated assembly comprising a coil, integral magnetic iron path, and snap-on plug connection.

The synthetic material encapsulation provides an effective compact housing, offering full protection against dust, oil, water, etc.

Ease of mounting in a confined space - offers shock and corrosion protection - simplifies conversion of existing equipment to other requirements, etc.

Coils conform to the IEC/CENELEC safety standards and comply with European low-voltage directive.

Specification		UL Coil with two 500 mm flying leads			
Reference		496081

**FLAME PROOF ENCAPSULATED
ELECTRICAL PARTS "db mb"**

These coils can be mounted with every Parker ATEX solenoid valve corresponding to the specified Coil Group.

See column "Coil Group" in the valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex db mb IIC T4 is required.

Benefits: Rotatable 360° fibreglass-reinforced plastic housing (class H). Solenoid coil, rectifier (silicium diodes), fuses and varistor protection are completely encapsulated into the coil housing by epoxy resin for shock and corrosion protection.

The plastic housing is delivered with M20 x 1.5 cable gland certified for use "db" protection. Small size for ease of mounting in a confined space.

How to Order

Pressure vessel and electrical parts included in this catalogue are available as stand-alone items and should be ordered separately. The pressure vessel includes the housing (nameplate, nut and washer). Please consult your local sales office in case of demand for configured options.

Step 1

Select the pressure vessel catalogue number (description) and/or part number at pages 6 to 12.

Step 2

Please refer to the electrical group to determine the compatible coils on pages 13 to 17. Please follow the instructions included in each coil datasheet to determine the coil reference + voltage coil combination.

Step 3

Select accessories on page 18.

WARNING - USER RESPONSIBILITY

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

- This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.
- The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.
- To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 00800 27 27 5374.
